

# Bassil Younes

Toronto, ON  
(416) 575-6187  
[bassilyounes@gmail.com](mailto:bassilyounes@gmail.com)

As a passionate and driven web development student, I excel in creating dynamic and user-friendly websites. My ultimate goal is to obtain a position as a Full Stack Developer, where I can leverage my skills and knowledge to create innovative and captivating web applications. I am committed to staying on the cutting edge of my field, continuously learning and growing to keep up with the latest trends and advancements in the industry.

## EDUCATION

### Humber College, Etobicoke, On—Web Development

Sept 2022 - Sept 2023

I have acquired knowledge on all the essential elements required for becoming a skilled web developer.

### Seneca College, Toronto, ON—Entrepreneurship and Small Business Administration

Sept 2019 - April 2022

I have acquired numerous valuable business skills that I utilize on a daily basis, thanks to my graduation with honours.

## PROJECTS

### Portfolio—Built with REACT, MySQL, and Laravel CMS

I found this project to be crucial in developing my backend skills. It involved creating a webpage using React.js alongside a Laravel CMS system. It also served as an excellent platform to showcase my other projects. Portfolio: [www.bassilyounes.com](http://www.bassilyounes.com)

### GiftStack—Built using ASP.NET with C#

I created GiftStack to address my past forgetfulness in getting gifts for the people in my life. This application stores information about the gifts, the recipients, and the events using web APIs.

### ShoeShop—Built using Node.js, MongoDB, Express, and Pug

I created a shoe shop app that showcases my knowledge of Node.js and MongoDB. The app is designed to display database content in a responsive manner.

### Laser Pointer—Built with an Arduino, servos and Visual Studios in C#

I created a laser pointer project that can be controlled with a mouse. Despite having little to no experience in robotics, I built this project entirely from scratch.

## SKILLS

- Works well in a team
- Loves learning new skills
- Strong understanding of business concepts
- Very quick learner
- Strong people skills
- I am a very resourceful and persistent person

## Technical Skills

### Backend Skills

- NodeJS
- Express
