www.Bassilyounes.com

A passionate and driven Web Developer, excels in creating dynamic and user-friendly websites. The career goal is to become a Full Stack Developer, leveraging skills and knowledge to create innovative and captivating web applications. Committed to staying on the cutting edge of this field, continuously learning and growing to keep up with the latest trends and advancements in the industry.

RELEVANT EDUCATION

Humber College, Web Development — Etobicoke, ON
Post Graduate Certificate with honours
Sept 2022 - Aug 2023

- Acquired knowledge and hands on experience on all of the essential elements required for becoming a skilled web developer.
- Took roles such as Project lead, Mentor, Peer tutor.

Seneca College, Entrepreneurship and Small Business Administration — Toronto, ON
Honours Diploma
Sept 2019 - April 2022

- Acquired valuable hands on business, allowing for a seamless transition into any workplace.

RELEVANT EXPERIENCE

Software Developer — S2H Business Information Systems
Sept 2023 - Present

- Implemented updates to client websites as needed using FTP connections and making changes in HTML, CSS and JavaScript.
- Sucessfully managed clients with competing deadlines.

Software Developer — BlueBird IT Solutions
Summer 2023

- Highly involved in the development of an internal web application designed to manage customer billings and payments.
- Tasks included: Implementing and interacting with APIs, creating components, writing documentation, and unit tests. Technologies used: Next.js, SQL, TypeScript, AntD, Jest, Docker, Java, Spring Boot, and Git.

RELEVANT PROJECTS

Portfolio—Built with REACT, MySQL, and Laravel CMS
A crucial product which developed my backend skills. It involved creating a webpage using React.js alongside a Laravel CMS system. It also served as an excellent platform to showcase my other projects. Portfolio: www.bassilyounes.com

GiftStack—Built using ASP.NET with C#
GiftStack was created as an organizational tool to never forget the important people in my life. This application stores information about gifts, recipients, and events using web APIs. A highly effective way to organize gift giving.

BrickMMO GPS—Built with Python, REACT, Node and MySQL
BrickMMO is an autonomous Lego city located in Humber College. The GPS project combines the Lego EV3 and Pixy2 AI cameras to geolocate all entities in the city and efficiently store the data in an SQL database for all other systems to reference through REST APIs.

Backend Skills
- NodeJS
- Express
- PHP
- C#
- ASP.NET
- MySQL
- Python
- Flask

Frontend Skills
- React
- JavaScript
- jQuery
- CSS
- HTML

Technologies
- MongoDB
